SUMMARY

Aspiring Data Analyst and Software Developer with a BSc Honours degree in Computer Science from the University of Zululand. I have experience working on academic and personal projects involving data analysis, web development, and isiZulu text research for Natural Language Processing (NLP). I am currently completing workplace training at Hulamin, where I am gaining exposure to a Project Management System using C# and .NET technologies, as well as creating reports and dashboards using Microsoft Power BI. I'm looking forward to leveraging my skills and passion for technology to make a meaningful impact, which makes me a deserving candidate.

SKILLS

Python | Java | C# | JavaScript | HTML | CSS | SQL | ASP.NET Core Web API | DevExpress MVC | Pandas | Matplotlib | Power BI | Git | GitHub | Azure DevOps | Azure Pipelines | Google Colab | Jupyter Notebook | Apify | Oracle SQL | Data Cleaning | Data Analysis | Data Visualization | NLP Preprocessing | Testing | REST API Development | Web Development | Problem Solving | Team Collaboration | Communication | Time Management | Documentation | Research Skills

PROJECTS | <https://github.com/LunganiGcabashe/>

Exploring the Accumulation of iSizulu Text Data from Facebook to Train Large Language Models | Honours project Apr 2025 – Nov 2025

Conducted research on the accumulation and preprocessing of isiZulu textual data from public Facebook pages for Natural Language Processing and Large Language Model research. Used Apify to collect public Facebook data and applied Python-based preprocessing techniques including text cleaning, language detection, sentence segmentation, stopwords filtering, and JSON structuring using Google Colab. The project focused on preparing NLP-ready datasets for low-resource African language technologies.

Nike Sales Analytics | Data Analysis Mar 2026 -Apr 2026

Developed a retail sales analytics project using Python and Pandas to clean, transform, and analyze a large Nike sales dataset. The project involved handling missing values, correcting inconsistent data, engineering additional features, and identifying key business insights such as regional performance, seasonal profit trends, and top-performing products. The analysis process focused on improving data quality and producing meaningful visual insights using Matplotlib.

Portfolio Website | Frontend Development Apr 2025-Jun 2025

Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase technical skills, projects, and professional information. Implemented responsive layouts, interactive navigation, and modern user interface principles to ensure accessibility across desktop and mobile devices. The website was deployed using GitHub Pages.

University Student Assistance System | Final Year Project Apr 2025-Jun 2025

Collaborated in the development of a web-based student assistance system designed to support academic scheduling and communication processes within a university environment. Contributed to frontend development using HTML, CSS, and JavaScript, while integrating SQL database functionality for managing student information. Also served as team leader, coordinating development tasks and ensuring effective collaboration throughout the project lifecycle.

EXPERIENCE

GIJIMA — INTERNSHIP PLACEMENT AT HULAMIN Apr 2026 – present

As part of the Gijima internship program, placed at Hulamin in Pietermaritzburg as an intern developer within a team of 4 interns. Contributed to the design, development, testing, and deployment of a full-stack internal Project Management System, building the Oracle SQL database, REST APIs using C# ASP.NET Core following Clean Architecture principles, and a frontend using ASP.NET Core

MVC with DevExpress UI components. Implemented unit and functional testing for APIs and frontend controller logic, including positive and negative test scenarios to improve system reliability and maintainability. Assisted in configuring Azure DevOps CI/CD pipelines for automated builds, testing, and deployment workflows. The system allows Hulamin ICT staff to create, track and manage internal projects, assign real employees from Active Directory as developers and stakeholders, track due date revisions with full audit history, and collaborate through project comments. Additionally, developed Power BI reporting dashboards to provide management with visual insights into project status, priorities, and progress across the organization.

EDUCATION

Institution: University of Zululand

Honours in Computer Science - Completed 73% | 2025

Completed an honours degree focused on advanced computing concepts including research, data processing, and software development.

BSc in Computer Science & Physics - Completed 65% | 2021 - 2024

Built a strong foundation in programming, mathematics, networking, software engineering, and computer science fundamentals.

TRAINING

Gijima Holdings

Data Science Internship Programme | 2026

Completed a structured industry-focused internship program covering Data Science, Python, SQL, Power BI, Microsoft Azure, and professional development, earning Microsoft certifications. The program included a 3-month workplace experience placement at Hulamin (Pty) Ltd in Pietermaritzburg, where theoretical knowledge was applied in a real-industry environment working on live software development projects.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- Microsoft Azure Data Fundamentals (DP-900)
- Microsoft Power BI Data Analyst Associate (PL-300)
