SUMMARY

Computer Science Honours graduate with hands-on experience in full-stack software development, data analytics, and business intelligence. Recently completed a workplace placement at Hulamin (Pty) Ltd through the Gijima Data Science Internship Programme, contributing to two enterprise applications built with C#, ASP.NET Core, Oracle SQL, DevExpress, Azure DevOps, and Power BI. Passionate about building data-driven solutions and continuously improving technical and problem-solving skills.

SKILLS

Programming Languages: Python, C#, Java, JavaScript, SQL

Web Development & Software Engineering: ASP.NET Core Web API, ASP.NET MVC, DevExtreme / DevExpress MVC, REST API Development, Clean Architecture, HTML, CSS, Web Development

Data Analytics & Business Intelligence: Power BI, Pandas, Matplotlib, Data Cleaning, Data Analysis, Data Visualization, NLP Preprocessing

Databases & Cloud Technologies: Oracle SQL, Azure DevOps, Azure Pipelines

Testing: xUnit, Moq, Playwright (end-to-end testing)

Tools & Platforms: Git, GitHub, Google Colab, Jupyter Notebook, Apify

Professional Skills: Problem Solving, Team Collaboration, Communication, Time Management, Documentation, Research Skills

EXPERIENCE

Gijima — Internship Placement at Hulamin (Pty) Ltd

Apr 2026 – Jun 2026

- Worked within a team of four interns in an Agile development environment.
- Contributed to the design, development, testing, and deployment of an internal Project Management System.
- Designed and developed Oracle SQL database tables, relationships, queries, and stored procedures.
- Developed REST APIs using C# and ASP.NET Core following Clean Architecture principles to support project management workflows.
- Developed frontend functionality using ASP.NET MVC and DevExpress components.
- Contributed to a Proof of Delivery (POD) management application built with ASP.NET Core MVC and DevExtreme UI components, backed by a separate API layer using the Wolverine message bus, following a layered architecture (MVC controller → API controller → Query/Command handlers → Repository → Oracle database).
- Set up unit testing from scratch using xUnit, Moq, and debugged Playwright end-to-end tests for form validation.
- Assisted with Azure DevOps CI/CD pipeline configuration, including resolving a release pipeline failure caused by artifact naming and path mismatches.
- Created Power BI dashboards to provide project status and progress insights.

PROJECTS

Exploring the Accumulation of isiZulu Text Data from Facebook to Train Large Language Models — Honours Project

Feb 2025 – Dec 2025

- Conducted research on collecting and preprocessing isiZulu text data from public Facebook pages for NLP and LLM research.
- Used Apify to gather publicly available Facebook data.

- Applied text preprocessing techniques including text cleaning, language detection, sentence segmentation, and stopword removal.
- Structured and processed datasets using Python and Google Colab.
- Prepared NLP-ready datasets for low-resource African language technologies.

Nike Sales Analytics — Data Analysis

Mar 2026 – Apr 2026

- Cleaned and transformed retail sales data using Python and Pandas.
- Handled missing values and corrected inconsistent records to improve data quality.
- Performed feature engineering to support deeper business analysis.
- Analysed regional sales performance, seasonal profit trends, and product performance.
- Created visualizations using Matplotlib to communicate business insights.

Portfolio Website — Frontend Development

Apr 2025 – Jun 2025

- Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript.
- Showcased technical skills, projects, and professional achievements.
- Implemented responsive layouts for desktop and mobile devices, applying modern UI and accessibility principles.
- Deployed the website using GitHub Pages.

University Student Assistance System — Final Year Project

Jul 2023 – Nov 2023

- Collaborated in the development of a web-based student assistance system.
- Developed frontend functionality using HTML, CSS, and JavaScript, and integrated SQL database functionality for managing student information.
- Served as team leader, coordinating development activities, project planning, task allocation, and progress tracking.

EDUCATION

University of Zululand

- Honours in Computer Science — Completed 73% | 2025
- BSc in Computer Science & Physics — Completed 65% | 2021 – 2024

TRAINING

Gijima Holdings — Data Science Internship Programme | Feb – Aug 2026

Completed a structured, industry-focused internship programme covering Data Science, Python, SQL, Power BI, and Microsoft Azure, earning Microsoft certifications. The programme included a three-month workplace placement at Hulamin (Pty) Ltd in Pietermaritzburg, where theoretical knowledge was applied to live software development projects.

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- Microsoft Azure Data Fundamentals (DP-900)
- Microsoft Power BI Data Analyst Associate (PL-300)
